

Respectfully I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve. This is a FREE country and local broadcasters offer free service. XM is a pay service and Subscribers should be able to get as much programming as possible for the money we pay. Maybe if local land broadcasters shut up, played more music and less commercials or no commercials there would be less people willing to pay for satellite radio. All I know is I have a friend who is a member of NAB and he gets sat radio because he is fed up with commercials and the antiquated NAB.
